Expected Graduation June 2021

Relevant Coursework:

- Data Structures
- Information Management (SQL, Database Design)
- Operating Systems and Networks
- Concurrent Systems
- System Architecture
- Technical Writing
- Blockchain
- Software Engineering

Projects

Meal Fridge - Senior Project

Worked in a 4 person SCRUM team to create a web application using the ASP.Net framework. The project keeps an updatable list of ingredients in the user's fridge, a list of favorite recipes to assist in making a meal plan for the week, and generates a shopping list for the user. The project would be completed over a series of 6 sprints and required daily and weekly meetings with all team members, as well as the product owner. Version control was done using Git and Github.

Work Experience

Senior Office Assistant, Confederated Tribes of Grand Ronde

Oct 2015 - January 2017

- Archiving and maintaining a collection of significant artifacts
- 3D scanning and printing artifacts using a combination of photogrammetry and IR scanning for display and education purposes
- Transcribing interviews with tribal elders
- Digitizing and archiving legacy media
- Data entry and record keeping
